

HEALTH, SAFETY, ENVIRONMENT AND QUALITY POLICY

We are committed to excellence in customer services and fulfillment of corporate responsibility through provision of high quality, safe, reliable and environmentally-friendly fuel transportation services. We pursue continuous improvement in our performance in line with best industry practices.

Ensuring health and safety of our employees and all those likely to be affected by our operations is one of our basic corporate objectives and ranks equally with profit. We ensure complete adherence to the health and safety codes and practices and applicable laws and regulations.

Total quality management is the cornerstone of our operational activities. It covers equipment, people, and environment. Timely maintenance, refurbishment and upgrading of our terminal and pipeline facilities is carried out to ensure consistent conformance to prescribed standards and specifications across the whole range of activities from product receipt, storage, transportation and delivery.
